REVIEW OF FINANCIAL PERFORMANCE

FLT achieved gross revenue of A$42.2 million for the Quarter, 4.8% above Forecast of A$40.3 million, and adjusted net property income of A$32.3 million, 4.7% above Forecast.

Distributable Income was 12.1% above Forecast at A$26.5 million, backed by contributions from the four completed properties acquired in August 2017\(^3\), coupon interest income from the three development properties, and partially due to the recovery of an insurance claim provided for in the prior quarter. FLT also benefited from interest savings arising from a lower actual weighted average interest rate of 2.8%\(^4\) per annum, compared to a forecast weighted average interest rate of 3.4%\(^4\) per annum and lower debt drawn as compared to Forecast. The distributable income for the quarter ended 30 September 2017 had been hedged at a higher exchange rate compared to the Forecast exchange rate. Accordingly, Distribution per Unit (“\textbf{DPU}\)” for the Quarter was 8.6% above Forecast at 1.77 Singapore cents.

Mr. Robert Wallace, Chief Executive Officer of the REIT Manager, said, “We are pleased to report a strong finish to FLT’s first financial period close having surpassed the IPO forecast for the fifth consecutive quarter. Our performance reflects the strength of FLT’s property portfolio, proactive asset management with 172,193 sq m of floor space leased and/or renewed since listing, representing 13.1% of FLT’s total gross lettable area as at 30 September 2017\(^5\). Our position as a leading industrial landlord in Australia was strengthened through the acquisition of 10 new properties since FLT’s listing, increasing its total portfolio value to A$1.91 billion as at 30 September 2017.”

OUTLOOK

Australian industrial supply is generally in line with the long-term average with development activity focused on the eastern seaboard cities of Sydney, Melbourne and Brisbane. Demand remains strong and developments are predominately leased prior to completion. Year-to-date gross take-up levels are above the 10-year average and this strong growth is largely attributable to the benefits of population growth, increased public infrastructure investment, tenant consolidations and activity driven by withdrawals from inner locations.

Australian investment activity has been characterised by a lack of on-market investment grade stock. Portfolio transaction levels remain strong and more than a third of the national sales volumes recorded in 2017 occurred in Sydney. Given a limited pool of stabilised assets, some institutional investors are shifting up the risk curve with a focus on land purchases and secondary assets with value-add opportunities. These transactions have underscored a tightening in the yields for secondary assets.

Looking ahead, the REIT Manager will continue to grow FLT’s prime industrial portfolio with a focus on generating sustainable, long-term value for our unitholders.
